RODS

keep it single

NEW XO GRAPHENE

The next level of XO fly rods. We wanted to bring out the new generation of XO rods only if we could make significant improvements for the materials. Graphene made this possible. 3 years of testing prototypes and actions lead to the launch of XO Graphene fly rods. With this new material available and with it being the strongest tested material in the world it required a lot of testing and tuning of actions. When one of these rods is casted the first time the difference is noticeable right away. Graphene makes it possible to make stronger rods with less material which results actionwise with unbelievable strenght combined to smooth actions.

- Medium fast action
- Four piece rods
- Unsanded & unpainted blank for the best action
- Graphene is the strongest tested material in the world
- Novel reel seat design
- Up-locking precision machined aluminium reel seat
- AAAA Portuguese cork with rubber cork reinforcements
- Patented single leg REC nickel titanium alloy guides
- Titanium stripping guides from American Tackle Co.
- Supplied in a custom aluminium tube with engraved metal end caps together with a cloth bag

XO
Fly gear par excellence
XOFLYFISHING.COM

XO

XO rods are made by incorporating a novel silica nano resin combined with a mix of different high modulus graphite fibers. We have also used all the best components from REC guides to high quality Portuguese cork handles. These rods have a customised modern medium fast action on each model for the kind of fishing they are most likely used at. All XO rods are finished off with a Finnish curly birch wooden insert on the reel seat which tells about our origins in Finland.

- Medium fast action
- Four piece rods
- Unsanded & unpainted blank for the best action
- Novel silica nano resin combined with a mix of different carbon fibre

SISU

Finland is the country of thousands of lakes. The lakes are connected by streams and these streams are the birth place of fly fishing in Finland. The other trait Finland is known for is forests that are more than plentiful. This means that the streams are covered with trees and overhead casting is rarely possible. For this reason we wanted to create a rod range named Sisu which would be perfect for fishing in our home waters. Ofcourse these rods will excel wherever a smooth medium fast action rod is needed. Sisu is a four piece rod and comes in a triangular nylon tube.

CODE	LENGTH	LINE	PCS	WEIGHT	RRP

NYMPHMANIAC

Nymphmaniac rods have been designed together with some of the best competition anglers in Europe including Jarkko Suominen, Cato Monsen, Jan Kubala and David Ferreras. They are designed especially for modern nymph fishing techniques. Nymphmaniac meets the requirements of the most demanding anglers in a reasonable price range. Everything on these rods is built with the intended purpose in mind. These have been designed to be as light and as easy to handle as possible.

The blank dampens immediately after stop when casting which is extremely important to sustain proper contact and a feel for light nymphs. New and modern nymph rods have enough power in the tip so hooking a fish is effortless but at the same time they bend enough when a fish is making sudden movements when fighting. Also fighting a bigger fish is not a problem with the powerful butt section of the rod.

The perfect nymph fishing setup is completed with the Vision Ultra Light Nymph-line.

Onki consists of 13 carefully created medium-fast rod models to cover most of the situations anglers face when fishing for normal freshwater species on creeks, rivers and on various stillwater destinations. The quality of high-modulus Korean graphite (40 tn) is something you normally find only in more expensive rods and it enabled us to create a very light and sensitive rod. The rest of the components are also of great quality. For example the handles have narrow rubber/cork reinforcements to make them more durable. With these rods your money is truly well spent.

- Medium fast action
- Four piece rods
- Light and sensitive
- High-modulus Korean graphite (40 tn)
- Green olive blanks with graphite grey markings

VAPA

Vapa, meaning “rod” in Finnish, stands behind its name as it’s a rod for everybody. Easy to cast for beginners with its medium fast action but the more experienced angler shouldn’t be fooled by the price tag. It has performance even for the more demanding angler.

EKA

EKA, meaning “first” in Finnish, are incredible rods in their price range. The blanks are made from 24ton low resin graphite making these rods light in weight and well balanced in hand. Thanks to their 4 – piece construction and narrow and light plastic tube these are easy to pack for your travels. The matt finished graphite colour blank not just look good, but it also prevents you and fish from unwanted reflections. Narrow cork handles are sensitive and anodised reelseat hold your reel nice and firm.

GLASS TROUT & STREAMER

GLASS TROUT and **STREAMER** are pure fibre! They have deep bend but same time it offers plenty of power for over long casts. These are not a traditional glass fibre noodle type rods, they really performs well with different type fly lines. You'll find **TROUT** best in smaller to medium size rivers and it'll surprise you when rigged with Vibe 65 type short headed line. With that line it'll turn the big, hairy dries or heavy nymphs over with ease. Vibe 85+ or Bottom Express is the ideal choice for **STREAMER**. When playing a fish they feel like rubber shock absorbers keeping the fish hooked until the picture & release.

- Full flex
- Two piece
- Chrome plated stainless steel snake guides & stripping guide
- **TROUT** has a cork half wells handle
- **STREAMER** has a small cork full wells handle & small cork fighting butt
- Matt black aluminium reelseat with glass fibre insert
- Fibre glass rod tube
- Cloth bag

TANE SOFAROD

Tane Sofarod is intended, as the name suggests, to also be used indoors. Great for learning the basic principles of fly casting even while sitting on your sofa in front of a TV screen watching your favourite fly fishing video.

The package includes a miniature 4' Tane fly rod with a bulky fluorescent yarn. The yarn behaves pretty much the same way as a fly line and gives you valuable training also in situations where a full length fly line is impractical. The package includes also two target rings for accuracy practice. A great way to organise a fly fishing related game indoors with your family and friends.

MERISUOLA

The backbone of the Merisuola family consists of four piece lightweight fast action saltwater rods targeted at everything between the Caribbean bonefish and the GT's of the Pacific. These rods incorporate everything we have learned during 20+ years of rod design and manufacturing.

- Fast action
- Four piece rods
- A natural unsanded and unpainted blank for the best action
- Unique silica nano resin combined with a mix of different carbon fibre
- A double nut up-locking precision machined aluminum reel seat
- Patented REC nickel titanium stripping and snake guides
- Full wells handle with AAAA Portuguese cork with rubber cork enforcement.
- Fighting butt size varies with rod weight and has a target species branded on the end cap of the FB
- Supplied in a custom aluminum tube with engraved metal end caps together with a cloth bag
- The tropical Merisuola fly line was developed in conjunction with the rods
- Designed and developed in Finland
- Tested all over the world by sailfish, tarpon, permit, jacks, bonefish, pike, seatrout etc...
- Own website www.merisuola.com

MERISUOLA
FLY GEAR FOR SALTY CRITTERS

MERISUOLA

NEW MERI

This is a range of rods which are especially targeted at coastal fishing from the cold waters of the Baltic to the flats of the tropics. These rods have a powerful progressive action with a relatively fast recovery speed which makes them a real joy to cast. As they are made for saltwater they feature hard chrome snake guides, American Tackle Company's Titanium frame stripping guides and a full aluminium reel seat. The handle is a full wells shape and made from high quality cork. All models have a fighting butt. These rods are 4-piece and come with a triangular rod tube & cloth bag.

BIG DADDY Ti

Our proven Big Daddy rods are a great choice for casting big, air resistant flies. Their powerful medium fast action is forgiving and pleasant when casting but they have brutal power for fighting monster size pike.

Big Daddy Ti rods have the same great action as the original Big Daddies. We've just added a couple of features to make this classic series even better. Black EVA handles are extremely comfortable when the weather turns nasty. The REC line guides are made of a corrode free nickel titanium alloy for hard abuse on saltwater conditions. Ti rods come in a fibreglass rod tube and with a rod cloth. Show your addiction and be proud of it...

- Medium fast action
- Four piece rods
- Titanium Recoil line guides by REC
- Titanium stripping guides by American Tackle Company
- Yellow blanks with colorful Big Daddy markings

ONKI DH & SWITCH

The Onki DH rods are made of high-modulus Korean graphite (40 tn) which is something you normally find only in more expensive rods and it enabled us to create very light yet powerful rods. The rest of the components are also of great quality. These rods are in a great price range and when compared to Tool rods they have a slightly softer action, especially in the case of Switch rods.

- Medium fast action
- Light and sensitive
- Four piece rods
- High-modulus Korean graphite (40 tn)
- Green olive blanks with graphite grey markings

REELS

have a brake

XO | MERISUOLA

34

56

78

910

MERISUOLA 1012

A premium reel requires a world-class brake, plenty of line capacity, a light but still solid construction and last but definitely not least a unique design to clearly separate it from all the other reels on the market. Those were our main targets with XO fly reels.

The 3-4 class reel is made with an adjustable click brake for the ultimate lightness. 5-6 and 7-8 are lightweight, large-arbour reels with well tested sealed disc brake design. Merisuola 7-8 has the same large-arbour design and brake system as the XO 7-8 however we have increased the brake power and capacity for this saltwater version of the XO reel.

The Big Brothers have the XO reel's stunning look fused with XLB reel's bomb proof & powerful brake. The brake mechanism has been used for over 20 years with countless huge fish under its belt and now it's mounted on this sturdy but beautiful reel family. On these reels this proven brake mechanism is sealed even better than in its predecessors. These bigger reels are aimed for heavy salmon and saltwater use. The brake power increases very linearly within 2,5 rounds, giving you impressive 8kg maximum force. The waterproofing utilises axle seals from German Ina and all bearings are from Japan.

- Large arbour
- Adjustable click brake on 3-4
- Sealed disc brake on 5-6 & 7-8
- Sealed disc brake based on XLB brake design on 9-10 & 10-11
- Built in counter balance
- SKF bearing grease

XLV

These modern looking reels have a proper disc brake package, a real large-arbour design and an EVA handle which provides a solid grip even in wet conditions. The family contains two designs: #3-4, #5-6 and #7-8 have a V-shape in the chassis. The black 7/8 and #8-9 models have the Vision heraldic shape. One family, two designs. All moving parts are greased with SKF's water resistant bearing grease. The popular 5/6 and 7/8 size XLV reels are also available in black.

- Large arbour
- V- or heraldic V- frame design
- Smooth disc brake
- Built in counter balance
- SKF bearing grease

XLV CUSTOM

NEW

NYMPH

NYMPH & DRY

KUST

MAMA

SWITCH

LOHI

THESE ARE CUSTOMISED VERSIONS OF THE XLV REELS TO SUIT CERTAIN FISHING STYLES IN THE BEST POSSIBLE WAY.

XLV **NYMPH** has a proper disc brake package, a real large-arbour design and an EVA handle which provides a solid grip even in wet conditions. All moving parts are greased with SKF's water resistant bearing grease. The Nymph reel is narrow and has ultra large arbour for quick line retrieve. It has a full body rim preventing thin nymph lines slipping wrong places and causing jams. Brake has been modified for lighter tippets and is super smooth. It also has a 360-degree adjustment.

NYMPH & DRY Super narrow and super large arbour reel for modern nymph and dry fly fisherman. Thanks to the large arbour, you can quickly reel in the loose line for fighting the big ones. Weightwise this reel is designed to balance the longer, light line weight rods and it does it perfectly. The drag is made smoothness in mind and the maximum force wasn't the key factor, therefore this is superb reel for thin tippets. Matt black appearance doesn't scare the fish and it looks good on all rods.

The **KUST** reel is based on the 7/8 XLV reel but it features the heraldic v-frame from bigger sizes. Silver colour with blue details fit nicely the Kust and Merisuola rods. This reel is equally home in lighter saltwater use too as it takes good amount of thin backing with a #7 weight Merisuola flyline.

XLV **MAMA** has a proper disc brake package, a real large-arbour design and an EVA handle which provides a solid grip even in wet conditions. All moving parts are greased with SKF's water resistant bearing grease. The Mama reel has a bold appearance with its red colour and black details. It fits perfectly all our pike & predator rods. The brake is powerfull enough for inshore saltwater use and it tames the northern predators with ease.

The **SWITCH** is perfect choice for modern switch rods. With its capacity it takes basically any switch line, no matter if it is a full line or a shooting head system. The full body rim is there for the ones who like thin monofilament type runninglines and it also adds strength of the reel for the moments when you fight big fish. The weight of the reel is matched to balance the Switch rods of 11' - 12'6" in length perfectly. The Switch has a proper disc brake package, a real large-arbour design and an EVA handle which provides a solid grip even in wet conditions. All moving parts are greased with SKF's water resistant bearing grease.

The **LOHI** reel is a sturdier and heavier addition to XLV family. It'll be the choice for rods longer than 13' and its brake system is capable of handling all anadromous fish species. Thanks to its corrosion proof construction it is more affordable option for saltwater use too. There is enough capacity for heavy shooting head systems or 10 - 12 SW lines with loads of backing. The Lohi has a proper disc brake package, a real large-arbour design and an EVA handle which provides a solid grip even in wet conditions. All moving parts are greased with SKF's water resistant bearing grease.

TANK

A great salmon reel doesn't have to be as light as a feather. When used with a long double handed rod, a reel is not just a fly line storage or a brake provider in your fishing set, but also very much a balancing element. The appearance of the reel closely follows classic salmon reel design principles with only a few holes on the handle side of the reel to provide some amount of ventilation for fly line and backing after long fishing hours. We wanted to have a full rim for the reel to fully eliminate those unfortunate occasions when a thin running line gets jammed between the frame and the spool. The final touch in our quest for old-school atmosphere comes in the form of an absolute kick ass brake sound.

- The brake is based on our proven GT reel
- A classic old-school outlook
- Solid and durable
- Anodized aluminum
- Full rim
- Mid-arbor spool

Ö

- Mid arbour
- Smooth disc brake
- Matt anodising

These are more traditional, mid arbour reels. They are more compact in size but still hold good amount of backing with modern full-length fly lines. Ö reels are light in weight especially when compared to their capacity so if you're looking for a light set, this could be your choice for a reel. The fully adjustable disc brake is smooth and offers plenty of power.

KALU

Kalu reels are real value for money. Their outlook is from our famous GT reel, just fattened up. They are machined die-cast reels which have eaten a sealed, smooth, drag system consisting of stainless steel and carbon discs. The one turn drag adjustment knob is fully machined. Kalu reels can take more than enough backing with a suitable fly line.

OUTFITS
ready to go

XLV100

- Medium fast action four piece XLV100 rod
- Non-sanded unpainted blanks
- Modern machined XLV56 reel on both #5 and #6 models
- Vibe 100 floating line with a 10 m head
- 20lb backing and a tapered 9' leader
- All pre-spooled and ready for action
- Comes in a cordura tube with a reel pouch

A true high-quality ready-to-go set. XLV100 rod is a strong 4-piece medium fast action rod with non-sanded unpainted blank. The reel is our modern machined XLV 56 reel. The line is our Vibe 100 with a 10-metre sky blue head and white runningline. Being a part of the Vibe family, which is famous for being almost ridiculously easy to cast, it has the same great features as the other members, including durability and slickness due to the integrated silicon particles, easy-to-cast, very little memory, loop at the tip of the line and many other great features. Add a decent amount of 20lb backing and a tapered 9' leader and you have a set which is second to none. It is packed into an easy-to-use protective cordura tube with a new type of reel pouch.

SOLINA

Solina fills the void between the Fis2 and XLV100 outfit with a quality never seen before in this price range. As always everything starts with the line which is our high quality and easy to cast Vibe 85. The reel is our proven Kalu with coloured details matching the rod. Solina set has a 4-piece rod that was especially designed for this series. The action is easy to cast for beginners but provides power and sensitivity even for the more experienced fisherman.

- Totally new 4-piece medium-action Solina rod
- Proven black Kalu reel with green details
- Extremely popular easy-to-use Vibe 85 fly line
- Suitable backing and 9' tapered leader
- Everything pre-spooled and ready for action
- Comes in a cordura tube with a reel pouch

NEW NYMPH & DRY

Vapa 10' line 3 and 4 rods have a perfect medium fast action for nymph and dry fly fishing. The Koma 56 reel balances the setup well and has a proper large arbour design. The fly line is especially made for this outfit. It has a thin diameter and a 10m head which works well for both dry fly and nymph fishing. The rod is packed in a round cordura tube and the reel comes with a pouch. The reel is ready to go with backing, fly line and leader attached.

FLY LINES

for single handed rods

NEW XO 100

DURASLIM™

XO HiFlo™ coating

The XO 100 is our most advanced fly line. XO has a super thin and durable DuraSlim™ coating. DuraSlim™ enables us to manufacture a line with super thin and durable running line. It also features varying hardness coatings in different parts of the line; the head being softer allowing you to push arrow shaped tight loops and the running line being harder for carrying extra-long overhangs and ultimate shootability. The fly line has super small loops on both ends and clear markings of the line weight near the tip of the line. Phthalate free.

XO has our STD™ taper making it one of the easiest casting all round fly lines. This provides outstanding control when shooting as well as carrying a long line out at all distances. The STD™ taper also enables roll casts and mends like the classic DT line. XO has a super slick and strong HiFlo™ coating. It also features varying hardness coatings in different parts of the line; the head being softer allowing you to push arrow shaped tight loops and the running line being harder for carrying extra-long overhangs and ultimate shootability. Due to XO's long rear taper and the fact that the line casts well no matter how much head is out we felt that the line doesn't have to be two-toned. The fly line has small loops on both ends and clear markings of the line weight near the tip of the line. At the request of coastal anglers, it is also available as SloMo. Phthalate free.

- Super thin and durable DuraSlim™ coating
- Varying hardness coating
- Floating, line weights #3 - #8
- Small loops on both ends
- Clear markings of the line weight on the tip loop

NEW STILLMANIAC

Stillmaniac lines are designed in conjunction with our Stillmaniac rods. These together create the ultimate combo for stillwater fishing. Stillmaniac fly lines have a 13 meter head and a taper designed for long casts required by many stillwater anglers. The total length of 33m will ensure even the best casters won't run out of line. In the front of the line we have an industry first tippet ring attachment for the leader. Very small, smooth and supple way to attach the leader to the fly line. SloMo, Fast Inter, Sink 3 and Sink 5 are all same color. This will keep your secret weapon hidden from spying eyes as it is impossible to identify the sinking rate from a far. The color of the sleeve behind the front tippet ring and the print on it will make sure only you know what sink rate you are using. This is the go-to range of fly lines for competition anglers. The low stretch core helps you to feel the takes and it also transfers casting energy better than traditional cores. The ready made loop in the back makes it easy to attach to the backing. The print to identify between weights is behind the front tippet ring. Phthalate free.

The Tane fly line is available both as a traditional weight forward (WF) line with a 11m head and as a double taper (DT) line. The coating used in this line is the result of long and extensive testing in Finland and beyond. This slightly thinner than normal WF line has a carefully designed taper that suits most fishing situations giving you nice presentation whether you are overhead casting or spey casting. Tane has a core with a 22% stretch for those delicate situations where thin tippets are needed. Both WF and DT lines have loops on both ends of the line. Total length 30m. Colour light olive / mint green. Phthalate free.

CODE	HEAD	LENGTH	RRP
VULN	Level	28m	49

ULN fly line is designed especially for Polish/Czech/French Nymph techniques. Because of the very thin diameter (only 0.58mm) and new slippery coating the casting is easy. Softness and lack of memory guarantee that you won't miss even the smoothest bite! On both sides of the fly line there are small smooth loops for attaching the leader and backing. This light beige line was specially designed to meet European standards of competition (minimum diameter 0.55 mm) and the development and design was done together with one of the greatest competition anglers in the world, Pablo Castro Pinos from Spain. The line is 28 m long and level, so you can turn it once the other end of the line starts to show signs of wear. This fly line is a must for all nymph fishing lovers! Phthalate free.

VIBE 100+

CODE	ITEM	RRP
VRP3F	WF3-4/8g Floating	83
VRP4F	WF4-5/10g Floating	83
VRP5F	WF5-6/12g Floating	83
VRP6F	WF6-7/15g Floating	83
VRP7F	WF7-8/17g Floating	83
VRP8F	WF8-9/19g Floating	83

Updated version of our Vibe 100 line. The running line is thinner than on the original with a 4 meters long thicker handling section just behind the head. The coating on this new version is the same proven coating we use on our Tane and Vibe 85+ lines. The coating is extremely slick and performs best at normal conditions in freshwater fishing between 0-25° Celsius. We also changed the colour of the line to a stealthier willow green head with a tan running line. The head is 10 metres / 30.5 feet long and is therefore a great all-round fly line. The low stretch core helps you to feel the takes and it also transfers casting energy better than traditional cores. The ready made loop in the front makes it easy to attach the leader. The front loop also has print on it to identify between weights. Phthalate free.

MERISUOLA

- Reversed compound taper (long rear taper, short powerful front taper)
- Slick and stiff coating for tropical heat
- Low stretch core (transfers casting energy better, firm hook set with hard mouth fish)
- Super strong ready-made loops
- Designed in conjunction with the Merisuola rods

VLT7F	WF7F	95
VLT8F	WF8F	95
VLT9F	WF9F	95
VLT10F	WF10F	95

Merisuola fly rods and fly lines were designed simultaneously to complete each other. The harsh saltwater environment and big, strong and fast fish is a combination, which sets some hard limits especially for fly lines. For that reason, we spent numerous hours testing and re-designing our Merisuola fly lines before we were confident that the lines were ready for the challenge. Phthalate free.

ONKI 110 floating, sink tip

VON7T	WF7 10ft Sink3 tip	59

The Onki is an all-round range of fly lines constructed using the latest technology for excellent turnover and presentation at any distance. With twin colours, the head is 11 metres long with a smooth user-friendly taper that is ideal for beginners and experienced anglers. The welded front loop makes for quick and easy leader attachment. The high buoyancy floating lines ensure long drifts and easy mending. The sink tip lines have a smooth transition for good casting and sub-surface line control. Phthalate free.

VST6I	WF6-7 / 15g SloMo	83
VST7I	WF7-8 / 17g SloMo	83
VST8I	WF8-9 / 19g SloMo	83

Kust line consists of a 10 m head and 20 m of floating running line. The line has a slick and supple coating which remains memory free even in cold conditions. The slickness is achieved by adding Teflon® particles to the coating and this way the slickness doesn't wear off either. The low stretch core helps you to feel the takes and it also transfers casting energy far more efficiently than traditional cores. The readymade loop makes it easy to attach the leader. Kust line with intermediate (SloMo) head gets your fly just under the surface in windy conditions. Phthalate free.

VBD10S4	WF10 / 23g Sink2 to sink4	83
VBD10S7	WF10 / 23g Sink5 to sink7	83

Grand Daddy fly lines are the offspring of our famous Big Daddy fly lines. Like its predecessor the Grand Daddy has an 8.5 metres head. We have shortened the front taper and lengthened the rear taper compared to the old Big Daddy line. This means this line has even more powerful turnover for big and air resistant flies. Perfectly balanced with our Grand Daddy rods. The coating is very slick and supple which remains memory free even in cold conditions. The low stretch core helps you to feel the takes and set the hook. It also transfers casting energy better than traditional cores. The ready made loops at both ends make it easy to attach the backing and leader. Phthalate free.

Sinking Grand Daddy lines utilise our **Sliding Density™** concept where the density increases gradually to the tip of the line. Except the intermediate line which is a classic full intermediate.

HYBRID
is what you want it to be!

HYBRID full line for all styles

CHOOSE YOUR STYLE

CHOOSE THE WEIGHT OF THE BELLY

CHOOSE THE LENGTH OF THE TIP

HYBRID tapered tips

HYBRID FLY LINE is what you want it to be! It is a shooting head with an integrated running line. The line consists of a running line integrated into the head. Hybrid tips are sold separately. We are giving you the option to choose what you want from this line. First choose your style. Scandi, Skagit, Switch or Single Handed. Then select the proper weight of the belly for your selected style from our recommendation chart. Lastly buy a separately sold tip in the length you desire. All Hybrid tips will work on all Hybrid fly lines. You can also use our ACE T-tips.

Our WF recommendation is a bit heavier than the AFTM standard. This recommendation works for when Hybrid lines are used as a normal weight forward line on single handed rods.

CODE	HYBRID FLOATING	BELLY LENGTH	RRP

VHY47F	47g / 720grain	8.0m / 26ft	89

BECAUSE OF THE LONG COATED RUNNING LINE WE RECOMMEND THESE FOLLOWING BACKING LINES:

7g – 23g: Dacspun 28lb
27g – 47g: Dacspun 36lb

Floating | Clear Floating | Clear Intermediate | Intermediate to Sink2 | Sink2 to Sink3 | Sink3 to Sink5 | Sink5 to Sink7

All Hybrid tips work with all Hybrid, Hammer, TNT, ACE Skagit and ACE Switch shooting heads. When choosing the tip, you only choose the length you desire and density. You don't have to think about the weight of the tip as we've done that for you.

Sinking Hybrid Tips utilise our **Sliding Density™** concept where the density increases gradually to the tip of the line. Except for the clear intermediate tip which is a full intermediate tip.

ALTHOUGH YOU CAN CHOOSE WHATEVER TIP LENGTH YOU DESIRE, HERE ARE OUR RECOMMENDATIONS FOR DIFFERENT STYLES / RODS:

- For **Single handed** rods we recommend **7.5' tips**
- For **Switch** rods we recommend **10' tips**
- For **Skagit-style** casting we recommend **12.5' tips**
- For **Scandi-style** casting we recommend **15' tips**
- For long casts on large rivers as a **long Scandi** line we recommend **20' tips**

FLY LINES

for double handed rods

XO shooting heads

XO shooting heads are long Scandi heads made for long casts and good control over the swing. The sinking heads utilise our Sliding Density™ concept known from our Ace heads.

FLOATING CLEAR TIP

The floating XO head is a unique full floater with a clear tip. It has a 5 metre floating clear tip for stealthy presentation.

CODE	FLOATING CLEAR TIP	LENGTH	RRP
VXO30F	30g / 460grain	12.3m / 40.4ft	84
VXO34F	34g / 520grain	12.7m / 41.7ft	84
VXO38F	38g / 580grain	13.1m / 43ft	84
VXO42F	42g / 650grain	13.5m / 44.3ft	84
VXO46F	46g / 710grain	13.9m / 45.6ft	84

SLOMO TO SINK3

The Slomo to Sink3 head is a very versatile sinking head whether the need is to get down deep in a slow current or just to get under the fastest surface current and slow down the swing in fast flowing pools.

CODE	SLOMO TO SINK3	LENGTH	RRP
VXO38S3	38g / 580grain	13.1m / 43ft	84
VXO42S3	42g / 650grain	13.5m / 44.3ft	84
VXO46S3	46g / 710grain	13.9m / 45.6ft	84

FLOAT TO SINK4

The floating XO head is a unique full floater with a clear tip. It has a 5 metre floating clear tip for stealthy presentation.

CODE	FLOAT TO SINK 4	LENGTH	RRP
VXO38F4	38g / 580grain	13.1m / 43ft	84

VXO42S7	42g / 650grain	13.5m / 44.3ft	84
VXO46S7	46g / 710grain	13.9m / 45.6ft	84

HAMMER skagit heads

Floating

Slide

We were in the forefront of the Skagit revolution in Europe. ACE Skagit shooting heads brought this deadly North American style from Pacific Northwest to the rivers of Northern Europe. Skagit style in general is one of the most effective and controlled ways to fish deep. Hammer Skagit shooting heads will deliver long and heavy sink tips with large and heavy flies easier than anything else. Hammer heads are sold as a belly only, without a tip. Tips are sold separately, and Hammer heads are compatible with our Hybrid and T-tips. All Hammer heads have ready made loops on both ends and weight & density print on the front loop.

The most versatile Skagit head. Easy to control during the swing and easy to change fishing depth by changing the tip.

CODE	HAMMER FLOATING	LENGTH	RRP	HAMMER FLOATING

ACE shooting heads

Ace heads have all the necessary features like super slim and strong loops on both ends, printing on the loops telling which end attach to running line and the weight & the density of the head. They are also built over supersensitive low stretch core so you'll feel even the lightest take. Phthalate free.

The biggest and most radical innovation in Vision shooting heads is our **Sliding Density™** construction of the sinking heads. Instead of making the line with two or even three different density materials we've made these lines with a continuous change of density. So for example our Inter to Sink 3 head's density changes gradually from intermediate to Sink 3. This way we have made a line which doesn't have ANY hinging effect during the cast. It flies in a nice and controlled loop offering extremely good energy transfer, turning over even really big and heavy flies. With the **Sliding Density™** construction together with the new Carrot taper we've been able to make the easiest casting sinking heads on the market, period.

The other thing with these heads is the Down To Earth colours. We felt that the lines should blend to the colours of the riverbed. So the sinking lines' colours are chosen to be brownish & greenish because that's what the stones and the bottom of the rivers often are. The Floating Carrot with its HiFlo™ - coating rides very high on the surface and with carrot orange colour it is very easy to see and follow exactly where your fly is. The Clear Float has a different approach. It is fully transparent, so it minimizes the shadow it casts to the bottom. In short, you'll spook less and hook more. It floats lower than the Carrot, just about on the surface, so the surface disturbance during the swing is minimal. Lower floating also adds friction when casting so it loads your rod more easily.

ACE floating on the surface

FLOATING CARROT

- HiFlo™ - coating
- Visible colour, easy to track when fishing

CODE	FLOAT	LENGTH	RRP
VAC34F	34g	11.3m / 37ft	69
VAC38F	38g	11.7m / 38ft	69
VAC42F	42g	12.2m / 40ft	69
VAC46F	46g	12.5m / 41ft	69

CLEAR FLOAT

- Clear low float coating on a clear monofilament core.
- The low float coating reduces the surface disturbance when you're swinging the fly. It also adds friction when you're making the cast helping you to load your rod properly
- With the clear coating you're less likely to spook the fish and more likely to hook them

SWITCH Line recommendations

#6	20 - 26g	400gr
<i>Spey</i>	ACE Switch 20g 23g 26g	<i>Skagit</i>

SHOOTING HEAD RECOMMENDATIONS

Choosing the weight for an ACE Switch / Scandinavian style shooting head for a switch rod depends on your preference and the length of the shooting head. That's why we give a range of weights to choose from. Here's the explanation for it.

- If you mainly cast overhead or prefer light shooting heads or cut them shorter than 8 metres you should go for the lightest option of the recommended range. For the #6 you would choose 20g.
- The middle one is our recommendation for medium length heads between 8 - 10m and it's also the safest choice for most. For the #6 we recommend **23g** heads.
- If you prefer heavy heads or have to cast in very confined spaces or use heads longer than 10 metres choose the heaviest option of the recommended range. For the #6 we recommend 26g.

TWO-HANDED Line recommendations

#8	30 - 38g	580gr
<i>Spey</i>	ACE 30g 34g 38g	<i>Skagit</i>

ACE SHOOTING HEAD RECOMMENDATIONS

Choosing the weight for an ACE / Scandinavian style shooting head depends on your preference and the length of the shooting head. That's why we give a range of weights to choose from. Here's the explanation for it.

- If you prefer light shooting heads or cut them shorter than 10 metres you should go for the lightest option of the recommended range. For the #8 you would choose 30g.
- The middle one is our recommendation for our ACE shooting heads and it's also the safest choice for most and works on medium length heads between 10 - 12,5m heads. For the #8 we recommend **34g** ACE shooting heads.
- If you prefer heavy heads or have to cast in very confined spaces or use heads longer than 12,5 metres choose the heaviest option of the recommended range. For the #8 we recommend 38g.

RINGS

CONTROL running line

This is a perfect running line for those who want to know where their fly is. This monofilament core running line has an orange HiFlo™ - coating with dark green markers at 5 m intervals. You can easily see how much line you have out and if you get a take it's easy to cover that lie again as you know how far it was. The monofilament core makes it slightly stiffer compared to our Rannari running lines so you're less likely to get tangles. They have a big loop at the front and smaller at the back for easy attachment to the backing and shooting head. Phthalate free.

CODE	STRENGTH	LENGTH	COLOR	RRP
VRLC33F	20lb / 9.1kg	30m	Blue	49
VRLC39F	30lb / 13.6kg	30m	Orange	49

RANNARI running line

A set of thin floating running lines to cover all your needs. All Rannari running lines have control markings at 5 m intervals. These running lines don't have any memory whatsoever so there's no need to stretch them before use. Built on our low stretch core. We have a small loop at the back and big loop at the front for smooth and easy attachment to your backing and shooting head. The big loop at the front helps threading spools through for changing fast between heads. Phthalate free.

.033" / 20lb for single handed and switch rods
 .036" / 30lb for double handed rods
 .043" / 50lb for heavy duty fishing where high breaking strength is a must.

CODE	DIAMETER	STRENGTH	LENGTH	COLOUR	RRP
VRR33F	.033" / 0.84mm	20lb / 9.1kg	30m / 98ft	Green	49
VRR36F	.036" / 0.91mm	30lb / 13.6kg	30m / 98ft	Yellow	49
VRR43F	.043" / 1.09mm	50lb / 22.7kg	30m / 98ft	Red	49

CATAPULT FLAT running line

If you are looking for maximum distances and ready to pay attention to controlling your running line, this is your choice. This super slick shooter type running line has very slow stretch giving you the ultimate feel on your fishing and it has very low memory. It is so slick that in a real fishing situation you have to remember to brake it a bit at the end of your cast to create some head and leader straightening friction. The spool has 100 metres so it rigs several reels, or just one if you're really good...

CODE	STRENGTH	LENGTH	COLOR	RRP
VRL35	35lb / 15.9kg	100m	Fl.yellow	33
VRL50	50lb / 22.7kg	100m	Fl.yellow	33

BÄKKÄRI backing line

Bäckkäri is an extensive (12 products) backing family. It consists of strength categories 12, 20 and 30 lbs. Available depending on the strength in 50m, 100m, 150m, 200m, 250m and 2500m spools. Extra thin, highly visible and very unlikely to cut into itself even when put under heavy stress during a fight with a big fish. If you don't find a proper backing for your particular needs (heavy saltwater fly fishing excluded) we are very surprised.

DACSPUN backing line

A Vision innovation. This backing is a quarter stronger, yet a quarter thinner than ordinary Dacron backings. It is a combination of strong Dyneema- fibers and Dacron. The mixture is developed so that it won't cut into itself. Comes in 28, 36 and 50 lbs.

ACE leaders

Designed to accompany the Ace Of Spey Shooting Heads. 2 PCS PER PACKAGE!

The short 6 feet leader is designed to give maximum turnover for big flies. It can be used with fast sinking shooting and Skagit heads to take your fly really deep. This is also a good base to build your own pike leader by adding a piece of wire at the tip.

CODE	TIP	LENGTH	STRENGTH
VAL631	0.31mm	6' / 182cm	6.3kg / 15lb
VAL634	0.34mm	6' / 182cm	8.2kg / 18lb
VAL638	0.38mm	6' / 182cm	9.1kg / 20lb
VAL643	0.43mm	6' / 182cm	11.3kg / 25lb

9 feet version is at its best with single hand fishing for bigger fish. It is also good choice for slower sinking shooting heads.

CODE	TIP	LENGTH	STRENGTH

NANO MONO leaders

Nano Mono leaders offer you two options for that special moment when you are facing the greatest challenge of the day. If you like soft and strong leader the Nano Mono is your choice. It has extremely high knot strength and it is totally memory free. It has more stretch than most leader materials making it act like a shock tippet, simply helping you to land more trophy size fish.

9 feet leaders for slightly easier fisheries.

BIG MAMA leaders

The new Big Mama leader family is made for active predator fly fishermen. You can choose your favourite from three different options: Classic, Stealth and Wire. All models include a robust Mustad's Fastach™ clip for quick and easy fly change.

BIG MAMA STEALTH

Stealth is made solely from our Space fluorocarbon 0.90mm. It is ideal for those conditions when the sea is calm and weather is sunny and fish seem to be super spooky. The total length of this leader is a bit over 2 metres. It has a loop on the rear end and a sturdy Mustad's Fastach™ clip on the front end.

BIG MAMA CLASSIC

Classic has a 50cm wire leader made from our Wireline (35lb) attached to a 160cm long fluorocarbon leader. They are attached with a tippet ring. This makes it easy to change the wire tippet when needed. The overall length of the leader is a bit over 2 metres. It has a Mustad's Fastach™ clip.

BIG MAMA WIRE

Wire is 50 cm long piece of heavy-duty wire (35lb) with a proper Mustad's Fastach™ clip on the front end and a big loop on the rear end. It is easy to attach the wire to your own leader.

CODE	ITEM	LENGTH	STRENGTH
VBL5	Big Mama Stealth	7' / 210cm	15.9kg / 35lb
VBLC	Big Mama Classic	7' / 210cm	15.9kg / 35lb
VBLW	Big Mama Wire	1'6" / 50cm	15.9kg / 35lb

PIKE wire leader

Vision Pike leader is made from our Wireline tippet material and tapered heavy duty monofilament leader. They are attached with a tippet ring. This makes it easy to change the wire tippet when needed. The overall length of the leader is 7 feet. Includes one extra tippet ring.

CODE	TIP	LENGTH	STRENGTH
VWL30	0.24mm	7' / 210cm	13.6kg / 30lb

SALMON leaders

Perfectly balanced for salmon fishing. The Salmon leader has a long heavy butt that allows turnover of large salmon flies and streamers. This leader has a profile that has been especially developed to suit modern double-handed fishing techniques.

CODE	TIP	BUT	LENGTH	STRENGTH
VSL34	0.34mm	0.69mm	15' / 450cm	6.3kg / 14lb
VSL38	0.38mm	0.69mm	15' / 450cm	9.1kg / 20lb
VSL43	0.43mm	0.71mm	15' / 450cm	11.3kg / 25lb

POLYLEADERS

Polyleaders consist of a thin tapered monofilament core with a flexible polymer coating on the outside. This is why they are more durable and turn over better than normal leaders. The loop in the leader eases the change of leader to either floating, intermediate or sinking.

LIGHT TROUT

SPACEFLUORO fluorocarbon tippet

The SpaceFluoro product family has a wide range of diametres suitable for competition anglers, streamer fanatics and saltwater/pike bums for both fresh and saltwater environments. In addition to being nearly invisible, this high-tech fluorocarbon tippet material has a big bunch of other highly valuable features.

SpaceFluoro might not be the cheapest tippet material on the market and it sinks pretty fast, making it not the best option for allround dry fly fishing. When it comes to any fishing taking place subsurface, regardless of whether you are after some tiny brookies with miniature nymphs, big brownies with large streamers or any of those saltwater torpedoes, the SpaceFluoro family has the model for you. SpaceFluoro, like all other Vision tippet materials, comes in snap together & rotate spools with line retainers. From 0.50mm the material is on larger spools to prevent unwanted memory.

- Dense and uniform material cuts the surface tension and sinks well
- Medium stiff fluorocarbon with exceptionally high knot and tensile strength
- Easy to tie with low memory
- Highly abrasion resistant due to smooth surface
- Tolerates UV light and harmful chemicals better than nylon tippets
- Great turnover in windy conditions

NOTE: THIS STUFF LASTS FOREVER IN NATURE, SO PLEASE DO NOT LEAVE IT THERE.

Prisma has great knot strength and it is easy to tie, thanks to a special coating and slightly bigger stretch. It is still hard material so it gives you great turnover if you are using heavily weighted flies and because of fluorocarbon's density it sinks, making it ideal for wet fly use. Slightly harder option than Space Fluoro.

Nano mono tippet material performs best when you need to use small flies with delicate presentation. It has superior knot strength and it is very easy to tie. It has more stretch than our other tippet materials so it acts also like a shock absorber, a great feature when using thin tippets. Because of this stretch you can use even thinner tippets than before as there are less sudden breakages.

Extreme tippet material has been in our repertoire for ages as there is always a need for slightly stiffer tippet, for example when fishing with big and heavy flies. However, this year we wanted to give it a proper face-lift and improve it to meet modern standards regarding material and manufacturing processes. Hence, we are proud to launch our new Extreme+ tippet material, which is even better than the legendary Extreme. This fluorocarbon coated monofilament family consists of 16 products from an extremely thin 8X all the way up to 0.50mm heavy-duty line suitable even for the biggest salmon in tough conditions. Extreme+, like all other Vision tippet materials, comes in snap together & rotate spools.

NANO LOOP braided loop family

Custom-made braided loop family made from our proven Vision Nano mono material. Four sizes to cover all possible line weights. The S is great for small line weights and there's also big enough option for the heaviest shooting heads with the XL. Small in size, these loops go easily through the guides and enable long casts and will not get stuck when fighting that colossal fish of a lifetime. **4 PCS / PACKET**

CODE	ITEM	STRENGTH
VBL-S	Small	6.8kg / 15lb
VBL-M	Medium	11.4kg / 25lb
VBL-L	Large	16kg / 35lb
VBL-XL	XLarge	20.4kg / 45lb

NANO LOOP INSTRUCTION

1. Cut the flyline tip **a** to an angle.
2. Slide the flyline inside all the way to the loop **b**.
3. Thread the loop **b** with provided monofilament **c** and put the tubing **d** on the monofilament.
4. Pull the tubing **d** on top of the braided loop all the way to the end. Secure with a ropof superglue.
5. You are ready to attach the leader with a loop to loop connection.

NANO LOOP INSTRUCTION

1. Cut the flyline tip **a** to an angle.
2. Slide the flyline inside all the way to the loop **b**.
3. Pull the shrink tube **c** on top the braided loop all the way to the end.
4. Heat the shrink tube **c** with the lighter. Observe the shrinking and stop heating when the tubing has shrunk tightly over the braided loop. Secure with a drop of superglue.
5. You are ready to attach the leader with a loop to loop connection.

WIRELINE wire tippet

This soft, plastic coated wire is designed for pike, barracuda and other type of toothy "friends". It can be easily looped with a melted loop or tied with a normal clinch knot. The 6 metres spool is enough for several leaders. There are three different breaking strengths; 15, 20 and 35lb.

CODE	ITEM	LENGTH	STRENGTH
VWL15	WireLine 15lb	6m	6.8kg / 15lb
VWL20	WireLine 20lb	6m	9.1kg / 20lb
VWL35	WireLine 35lb	6m	15.9kg / 35lb

TIPPET RINGS

Tie the end of your leader onto one of these and then tie your tippet length to the ring. These are also great for tying droppers to leader or when you want to attach fluorocarbon to monofilament and as they weigh almost nothing they do not affect turnover or the leaders floating/sinking properties. Our tippet rings are available as 10 or 20 kilo breaking strength. The matt black colour doesn't reflect so they won't spook the fish. **10 PCS / PACKET**

CODE	ITEM	STRENGTH
VTR	Small	12kg
VTRM	Big	20kg

FLY SWIVEL

If you have ever fished for pike with fly you have definitely had thoughts on how to connect your fly to the wire leader easily. This is the easy and secure option. Attach one of these at the end of your wire and you can change your fly quickly without having to cut the wire all the time. This is light enough so it doesn't disturb your fly's movement and the barrel at the end prevents most of the line twist which is often caused by these bird size pike flies. **10 PCS / PACKET**

WADERS

YOU'LL
FEEL MORE
COMFORTABLE
THAN EVER BEFORE
IN WADERS

37.5[®] TECHNOLOGY works with your body to balance heat and moisture, creating a personally regulated microclimate of comfort. Hydrophilic active particles attract water molecules even at the vapour stage. They absorb the body's IR energy giving water a reason to leave the particle.

Active particles add an immense amount of surface area to the fabric and this allows fabric to evaporate more water exponentially faster. By actively responding to body temperature, these particles use energy from the body to accelerate drying rates – up to five times faster!

THIRTYSEVENFIVE.COM

FEELS COMFY: 37.5[®] Technology works with your body to balance heat and moisture, creating a personally regulated microclimate of comfort.

NEW SCOUT 2.0

In addition to the big, waterproof pocket outside we have a multifunctional, removable, inside flip pocket which is ideal for smaller accessories. This flip pocket can be replaced with a separate, clear waterproof phone pouch in case you want maximum protection for your phone.

- Latest fabric featuring 37.5® Technology
- Fully waterproof chest pocket with YKK AquaSeal® or TIZIP MasterSeal 6 zipper
- Removable multifunctional flip pocket
- Seam optimization secured with our new E-Tape
- Heavier bottom fabric, lighter upper fabric
- Curved NoSeam™ cut for perfect fit
- Matching colour belt and braces
- D-rings and drying loops
- Built-in gravel guards
- Ultimate comfort

CODE	ITEM	SIZES	RRP
V9610	Regular	S - XXL	499
V9610	Long	ML - LL	499
V9610	King	MK - LK	499

Even better than the previous. Scout 2.0 waders are made from the same revolutionary 37.5® Technology fabric as the first edition, so you know that the breathability is in the world leading level. We have adjusted the cut so that these follow the same sizing as other Vision waders making it easier for you to choose the correct size. Both Scout 2.0 wader models have a fully waterproof front pocket which really keep the water out even if you happen to take a short accidental dip (of course, the zipper **needs** to be properly closed).

The good fit is achieved with the curved cut on the legs and the number of the seams are minimised for ultimate wear resistance. Elastic braces and belt allow you to adjust them for your comfort. The neoprene socks are made from High Density neoprene, both for comfort and longevity.

NEW SCOUT 2.0 ZIP

As the name says, this model has the full length zipper in front. Not only it makes getting in and out easier, it also helps to ventilate the wader during the extreme hikes. And when the nature calls, it is a handy feature. The main zipper is positioned in a slight angle to give you more support from the braces for opening and closing. This way we also managed to create more room for the waterproof pocket on the others side. Also, this pocket zipper is placed in an angle and this way you have easier access to the inside organisers of this pocket.

The **TIZIP MASTERSEAL 10** zipper is made from high-strength fabric coated with thermoplastic polyurethane. The extra strong plastic teeth are fixed the top and bottom of the zipper tape. The zipper's coupling elements keep the sealing edges tightly sealed together when the zipper is closed. **IKON ZIP WADERS.**

LIFT

The Lift system allows you to adjust the height of the waders anywhere from waist to chest height. This makes them a great all-round wader as in summer heat you can drop them down to cool yourself but within seconds you can pull them up, for example if you need to cross the river or otherwise wade deep.

The material is the same comfortable and highly breathable fabric as in standard Gillie and the wader is made with a thicker lower part for better wear resistance. The big front pocket is made from an elastic material accommodating lots of useful stuff.

- Adjustable height from waist to normal height
- Lightweight 4-layer construction
- Waterproof and breathable F4™ fabric
- Curved NoSeam™ cut for perfect fit
- A large stretchable pocket in front
- Built-in gravel guards
- Neoprene feet with left and right side design
- Drying loops

NEW KOSKI

Koski wader is made from soft and comfortable materials. The lower part's thicker material comes up to your thighs, so it makes this wader strong. The water resistant front pocket is made from wader fabric and features water resistant YKK AquaGuard zipper. There are an accessory attachment loops on both sides of the pocket and accessory strap on the upper end of the pocket, both outside and in so you can attach lots of useful tools to this wader. This wader comes with a waterproof, clear TPU pocket which is removable and ideal for your phone and car keys. There is a strong velcro for easy and quick attachment and two securing strings with hooks to secure this pocket.

- Lightweight 4-layer construction
- Waterproof and breathable F4™ fabric
- Curved NoSeam™ cut for perfect fit
- A large water resistant pocket in front
- D-rings & accessory loops and straps
- Waterproof & removable TPU pocket
- 2 heavy duty belt loops

WADING SHOES

NEW NAHKA Michelin

THE MICHELIN SOLE WHICH WE HAVE DESIGNED TOGETHER WITH THE WORLD FAMOUS MICHELIN TIRE MANUFACTURER OFFERS MULTIPLE BENEFITS OVER MANY OTHER RUBBER SOLES.

The front bumper is built into the outsole so there's no possibility for them to be separated. The pattern of the sole is inspired by Michelin LTX A/S tire with modifications targeted for wading. The lugs on the sides have aggressive sculptures giving you extra grip for slopes and muddy paths. The lugs in the middle have wave sipings for adherence and adaptability over uneven surface of the rocks. The front and heel sculptures are designed to take the wear and tear during longer walks and their pattern adds traction when needed. For extremely slippery & slimy conditions we made recessed positions for our Tungsten Carbide studs which can be added if needed.

The rubber compound itself is a mixture of an off road and Scandinavian winter tire compounds. Just like the studless winter tires on snow these soles give you a very good grip on rocks. The more you put pressure on the sole the harder it grips the rock surface, as the soft compound with sipped lugs adapt over the uneven surface.

In addition to a better grip the shoe has also a better feel while wading. The soft and well adaptive outsole combined with flexible EVA midsole lets you feel what's under your shoe, but same time it gives enough support even in the hardest of conditions. Longer walks in mind it still rolls comfortably and offers good torsional stiffness.

Maximum comfort has now maximum grip. Well-fitting leather shoe which offers great support both in wading and walking has now the Michelin outsole. The upper is a combination of water treated nubuck leather, microfibre and nylon mesh. The laces start far in front allowing you to tighten the shoe perfectly according to your own foot shape. This together with the characteristics of leather make these one of the most comfortable wading shoes in the market. Triple and double stitched seams, stitched & glued midsole and strong rubber bumper, which is part of the outsole, makes this a super strong shoe.

- Michelin rubber sole with built in rubber bumper for ultimate grip and wear resistance
- Leather, microfibre & mesh upper
- Double and triple stitched seams
- Long lace system for perfect tightening
- Strong rubber bumper for ultimate wear resistance
- Recessed positions for Tungsten Carbide studs

NEW MUSTA Michelin

Musta Michelin is a modern, lightweight wading shoe with TPU re-enforced ballistic polyester upper. The TPU print in designed areas give good wear resistance without making the shoe too bulky and heavy. The shoe is easy to get in and it tightens easily. For added strength the stitch lines have their own grooves and the EVA midsole and the front bumper of the Michelin sole are stitched to the shoe's upper.

CODE	SIZE	RRP	
V2092	7 - 14	229	<ul style="list-style-type: none"> - Michelin rubber sole with built in rubber bumper for ultimate grip and wear resistance - Lightweight and strong - TPU print to add wear resistance - Stitch grooves for protecting the stitches - Recessed positions for Tungsten Carbide studs

TOSSU

Tossu wading boots included some serious product development and investments in production. We wanted to develop a shoe with a more rigid structure to support one's foot in all possible conditions. Tossu has a unique moulded EVA midsole. The construction of this boot is made in a way which secures the upper part to the lower part extremely well due to both gluing and sewing the pieces together. The construction also enables the easy, solid and safe attachment of Vision studs. It provides good ankle support and the front rubber bumper gives great protection against rocks. Available with both felt sole and new brown Gummi™ sole with improved grip.

CODE	ITEM	SIZE	RRP	
V2085	Felt sole	6 - 13	134	<ul style="list-style-type: none"> - New moulded midsole - Very rigid overall design
V2086	Gummi™ sole	6 - 14	169	<ul style="list-style-type: none"> - Available with black felt and Gummi™ soles - Can be studded with Vision Tungsten studs

LOIKKA

The Loikka shoes' front part is well protected by a rubber shield. The number and positioning of vulnerable seams is optimized. The ankle part gives proper support and is lined with comfortable neoprene. The shoe is extremely easy to put on and take off. Shoe laces go through nylon loops on the lower part enabling fast and easy tightening of laces with less energy.

Loikka wading boots are available with a felt sole. Felt has always given the ultimate grip when wading even though it is not the best sole material on wet grass banks or long trail hikes. These boots are meant to be used in the hardest imaginable conditions. You just can't abuse them. Go and give it your best shot.

- Lightweight but solid
- Made from synthetic material for minimal water absorption
- Optimized seam placement
- Comfortable neoprene lining in the ankle part
- Proper protection for the toe and heel areas
- Durable nylon shoe laces
- Available with felt soles

CODE	SIZE	RRP
V3110	6 - 13	139

NEW KOSKI

Strong but lightweight Koski shoe is made from durable PVC material. This material doesn't absorb water like fabrics, so it dries quicker and feels lighter. The PVCs characteristics make this shoe very supportive and gives the shoe a good stability and torsional stiffness. The upper of the shoe is stitched to the moulded EVA midsole for strength.

CODE	ITEM	SIZE	RRP
V2088	Felt sole	6 - 14	115

- Made from synthetic material for minimal water absorption
- Optimized seam placement
- Comfortable lining in the ankle part
- Proper protection for the toe and heel areas
- Durable nylon shoe laces
- Available with felt and Gummi™ rubber soles
- Can be studded with Vision Tungsten studs

HOPPER

Hopper wading boots are very light in weight and therefore great for traveling fisherman. They are made out of strong nylon material and reinforced with a raised rubber bumper. The shoe opens up wide so it is very easy to put on and the nylon lace loops hold the laces while you tighten them up. High design with neoprene cushioning maximises the comfort and support. The front of the Gummi™ sole is raised and both the felt sole and the Gummi™ sole are stitched through to secure it.

- Felt sole stitched through to secure it
- Lightweight
- Made out of strong nylon
- Minimal amount of seams for longer life
- Comfortable neoprene lining
- Gummi™ sole stitched through to secure it
- Can be studded with Vision Tungsten studs

JACKETS & TROUSERS

NEW TOOL

Jacket with plenty of pocket space for your tools. Tool jacket features the fit of the Pupa but it has bigger barrel pockets on chest. In addition to these we made handy accessory holders and tool tunnels so that they stay nicely in place while rock hopping to your favourite pool. Lightweight 3 - layer fabric with thin tricot lining dries quickly and breathes well while is fully waterproof even in the nastiest of rain.

- Waterproof and breathable F4 fabric
- YKK® AquaGuard® VISLON® main zipper
- Strongly curved sleeves with incut cuffs
- Flap closure barrel chest pockets with additional zipper pockets with YKK AquaGuard® water resistant zippers
- Accessory flaps & tool tunnels
- Two hand warmer pockets
- A chest pocket inside the jacket with pass through for headsets
- Sunglass wipe on a cord clipped in to the D-ring of the left chest pocket
- Oversized fleece lined collar for hard core weather
- Fully adjustable hood
- Adjustable Velcro wrist cuffs
- Adjustable hem drawstring seals out bad weather

CODE	SIZES	RRP
V6432	S - XXL	269

PUPA

With this jacket on you can hide in the forest like pupae under river stones. Featuring the fit used in Opas, Kust and Lohi jackets this will fit nicely on most people. The Pupa jacket has curved sleeves for longer casting moves and a roomy hood with 2 - way adjustments. The water-resistant zippers are trusty YKKs and the main fabric is a nice and soft 3 - layer fabric. The spacious chest pockets take a couple of fly boxes each and the inside pocket is great for smaller items.

- Waterproof and breathable F4 fabric
- YKK® AquaGuard® VISLON® main zipper
- Strongly curved sleeves with incut cuffs
- Two hand warmer pockets
- Two outside chest pockets with YKK AquaGuard® water resistant zippers and D-rings inside the pockets
- A chest pocket inside the jacket with pass through for headsets
- Sunglass wipe on a cord clipped in to the D-ring of the left chest pocket
- Oversized fleece lined collar for hard core weather
- Fully adjustable hood
- Adjustable Velcro wrist cuffs
- Adjustable hem drawstring seals out bad weather

CODE	SIZES	RRP
V6431	S - XXL	259

NEW CADDIS

Lightweight shell jacket with roomy chest pockets. The hand warmer pockets are placed further down for easy use and comfort. The brushed and soft fabric lining makes this comfortable to wear even with only a t-shirt on. In case the weather turns nasty, this jacket can take it easily and the multi adjustable hood can be adjusted to give full protection.

- Waterproof & breathable F3.5 fabric
- 3 – layer construction for high breathability & quick drying
- High quality YKK® zippers
- 2 roomy zipper pockets with YKK AquaGuard® water resistant zippers
- Hand warmer pockets
- Adjustable hood
- Adjustable wrist cuff

CODE	SIZES	RRP
V6433	S – XXL	235

VECTOR

This traditional wading jacket has big barrel pockets on chest with easy flap openings and one napoleon type pocket next to the main zipper. The double storm flap keeps the rain out of the zipper and the adjustable wrist cuffs can be tightened to keep the water out. The smoke blue colour with dark red details makes you to disappear into background in misty mornings. Blue Vector jacket has been updated with same overall cut as our other jackets.

* NEW

- Waterproof & breathable F3.5 fabric
- 3 – layer construction for high breathability & quick drying
- High quality YKK® zippers
- One exterior napoleon pocket with a zipper
- 2 roomy barrel pockets
- Micro fibre lined hand warmer pockets
- Adjustable hood
- 2 nylon loops for forceps
- Adjustable wrist cuff

PrimaLoft® insulation forms a tight collection of air pockets that trap heat from your body and keep the cold out, providing excellent warmth to weight ratio. PrimaLoft® fibers have been engineered to be ultra-fine and mimic the softness of goose down. The fibers were developed to be water resistant to stay drier and maintain insulating properties. Specially developed fibre finishes repel water and keep the insulation drier even if water is forced into the insulation. Ultra-fine fibers make it more compressible.

SUBZERO HYBRID 40g

The new Subzero Hybrid 40g is a super comfy and light insulation jacket. Can be packed away into hand pocket and used as a travel pillow. The soft shell sleeves dry very quickly after releasing a fish.

- 20 denier nylon rip stop shell fabric with water repellent finish & 4-way stretch softshell
- Lightweight 40g PrimaLoft® Silver Insulation on body provides excellent warmth and compressibility
- Stretch material on hood, sides and sleeves gives jacket a snug, comfortable fit
- Highly breathable and quick drying
- 2 hand pockets of which one is stow pocket for the jacket

CODE	SIZE	RRP
V3371	S - XXXL	179

SUBZERO 60g

Our new 60g Subzero PrimaLoft® jacket is in our opinion the best all-around PrimaLoft jacket. It has a fixed ergonomic hood. A great jacket for any outdoor activities when the temperature is not ridiculously low. This new 60g version has a soft outer layer, in total 4 zipper pockets.

This jacket is equally suitable to be worn under a wading jacket for insulation as it is to be worn as the outer layer. It is highly wind resistant and can be packed in a very small space. If wet they dry quicker than a down jacket or fleece. The nylon shell fabric provides additional water and wind protection. These jackets have a full-length centre front zipper. Elasticised cuffs and an adjustable hem seal out wind and trap warmth.

CODE	SIZES	RRP
V3372	XS - XXXL	179

- 30 denier nylon shell fabric with DWR coating
- Lightweight 60 g PrimaLoft® Silver insulation provides excellent warmth and compressibility
- One chest pocket on the outside and one inside
- Two hand pockets with zippers
- Adjustable hem seal out wind and trap warmth
- Fixed ergonomic hood for maximum protection

SUBZERO PANTS 40g

Casual looking highly breathable PrimaLoft® pants. We chose 40g PrimaLoft® Silver Insulation because we felt this provided the best warmth to breathability ratio when you use these under your waders. Very comfortable against the skin or with our First Skin underwear when you need a bit of extra layering for those cold early season days.

- 30 denier nylon rip stop shell fabric with DWR/ Cire/ light coating treatment
- Lightweight 40g PrimaLoft® Sport Insulation provides excellent warmth and compressibility
- Highly breathable and quick drying
- Casual look and cut
- 2 pockets in front and 2 back pockets

VE NE bib & brace

Black Vene trousers are made from soft and lightweight 3 – layer wader fabric to maximise waterproofness even in the hardest conditions. They have side pockets on the thigh and big fleecelined hand warmer pockets on the chest. The trouser legs are big enough to accommodate high hiking shoes or wellington boots easily and they have adjustable cuffs, so they can be tightened snugly around your shoes. The adjustable braces & belt allow you to adjust them to fit perfectly. The overall cut is closer to normal clothing but it still allows you to wear warm layers underneath..

- YKK AquaGuard® VISLON® highly water resistant main zipper
- Comfortable fleecelined hand warmer pockets on front chest
- Thigh pockets with Velcro closure
- Breathable & waterproof 3 – layer fabric
- Hidden accessory loops by the braces

TUBES

MEGA BRA

A cross-breed between a fly fishing vest, a chest pack and a small day pack. It is easily adjustable for every size and a short front YKK® zipper and a buckle secure it when needed. The inside material of the vest is a strong mesh enabling proper ventilation. This multi-purpose combo is easy to put on and extra padding in the back makes it comfortable to wear during long fishing days.

CODE RRP
V3575M 119

- Strong ripstop material
- Six zippered front pockets
- Two zippered pockets inside and one on the rear
- Five mesh pockets
- Mesh lining for comfort
- Large expandable rear pocket
- 4 D-rings in front and D-ring for landing net on back
- One YKK® buckle and a zipper for closing
- Two integrated zingers

MYCKET BRA

- Strong ripstop material
- Two large zippered front pockets
- 3 Tippet pockets in front
- Large zippered mesh pocket in front
- 4 pockets for pin on reels
- Large zippered rear pocket
- D-ring for landing net on back
- YKK® buckles and zippers
- 2 D-rings in front
- Front and back parts can be easily separated (clips)
- The front can be used individually or attached to waders or a back pack
- Includes separate, adjustable, padded neck strap with D-loop
- Includes separate, adjustable, waist strap

This old favourite is very versatile. You can use the front individually with provided neck and waist straps or you can easily attach it to our Aqua Day Pack or almost any other back pack.

CODE RRP
V3577M 79

MINI BRA

Small in size, but big enough for the day's flies and accessories. The main compartment takes one big fly box and the smaller compartment accommodates a small box or plenty of tippets, leaders and other accessories. The Mini Bra can also be used on a wading belt.

- Strong ripstop material
- Two zippered pockets
- Small mesh pocket
- YKK® buckles and zippers
- D-ring for landing net on neck cord
- Can be used attached to waders or a back pack

CODE	RRP

CARIBOU VEST

- Comfortable rib knit collar
- Mesh lining for comfort
- Four large zippered front pockets
- Six pockets with velcro closure on front built in pin on reels
- Large zippered rear pocket
- D-ring for landing net on back

The Caribou vest has plenty of pockets, all well positioned and equipped with heavy-duty high quality zippers or velcro. The nylon outer layer is durable and highly water-resistant. The shoulders have an extra layer made of a porous flexible material that distributes the weight perfectly.

CODE	SIZE	RRP
V3367	XS - XXL	98

LOVE HANDLES

Love Handles is not only a traditional belt bag but you can also use it at chest height as it has an adjustable neck cord. There are two plastic clips that can be used to attach the bag onto our waders' D-loops or to the front of our Aqua Day Pack. This bag is wide enough on the sides to give you support with a heavier load and keep it steady. There's a D-ring in the neck cord to attach your landing net.

- Strong ripstop material
- Two large zippered pockets
- Large zippered mesh pocket
- Two built in retractors
- YKK® buckles and zippers
- Two plastic clips in front
- Two bottle mesh bags and two plier pockets
- D-ring for landing net on neck cord
- Can be used attached to waders or a back pack

AQUA HANDLES

A great all-round bag for active fisherman. Enables you to have the most needed fly boxes, tippet spools, line clippers etc. around your waist for quick use. The adjustable waist belt has small pockets which have in built bottle / accessory pockets which you can pull out only when needed, keeping the bag sleek and simple otherwise. The smaller water resistant outside pocket keeps your tippet spools and leaders easily available. This bag is waterproof **IF AND ONLY IF** closed well and securely.

CODE	SIZE	RRP
V5310G	29 x 12 x 18cm	69

AQUA DAY PACK

Aqua Day Pack is a totally waterproof backpack for your day trip to a fishing destination. It has a thinner and softer material than in the original previous generation. It has inner and outer mesh pockets for smaller items and an elastic nylon string outside. You can easily expand this bag by attaching our Love Handles, Mycket Bra or Mini Bra to the shoulder straps' D-rings. Waterproof roll-down closing with quick-release buckles for easy use. This bag is waterproof **IF AND ONLY IF** closed well and securely.

CODE	SIZE	RRP
V5308B	50 x 29 x 17cm	125

AQUA WEEKEND PACK

Aqua Weekend Pack has a waterproof main compartment and a big water resistant zipper pocket in front. This backpack is perfect for your longer trips to a fishing destination. It is light in weight compared to its size and comfortable to carry thanks to a sturdy carry system with a waist belt. It has inner and outer mesh pockets for smaller items and a big water resistant zipper pocket and an elastic nylon string outside. On both sides there are mesh pockets and multiple accessory straps for your rod tubes, water bottles or other accessories. You can easily expand this bag by attaching our Love Handles, Mycket Bra or Mini Bra to the shoulder straps' D-rings. Waterproof roll-down closing with quick-release buckles for easy use. This bag's main compartment is waterproof **IF AND ONLY IF** closed well and securely.

CODE	SIZE	RRP
V5313B	63 x 38 x 33cm	159

AQUA SLING

Aqua Sling gives you freedom to fish. It is totally out of your way until you need it and then with just one quick move you have full access to two compartment bag. Both compartments have inside pocket leaves with zipper pockets for smaller items. Main compartments are big enough for water bottles, several fly boxes, cameras etc. With YKK®'s highly water resistant AquaGuard® zippers it keeps your gear dry even in bad weather.

CODE	SIZE	RRP
V5312B	30 x 43 x 15cm	119

AQUATUBE

A real carry all bag which keeps all your stuff dry. With its wide entrance you can easily throw in a 4-piece rod tube and the one piece main compartment accommodates your week's fishing gear without problems. Carry handles and wide, well-padded shoulder strap make it comfortable to carry around. The water resistant outside pocket is handy for smaller items which you need to have quickly in hand. This bag is waterproof **IF AND ONLY IF** closed well and securely.

CODE	SIZE	RRP
V5309	82 x 30 x 30cm	129

TRAVEL BAG

CODE	SIZE	RRP
V5101B	84 x 33 x 35cm	105

Big enough to carry your fishing gear for a weekend trip. The Travel bag has 3 compartments; the one on the side has a big rubberised mesh allowing you to pack your wet wading gear, the middle one takes 2-3 standard rod tubes nicely and the third compartment is a general one for clothing and accessories. In addition to these the bag has a flat side size pocket which is ideal for a landing net, with a mesh pocket inside and a smaller zip pocket outside for example for your travel documents.

The bag has traditional carry handles and if not packed totally full it can be compressed smaller with the straps. For longer walks it has shoulder straps so it'll be easy and comfortable to carry on your back, with zippers safely facing your own back for security.

As a Vision feature we printed a bunch of different fish on the bottom so whenever you catch one, you tick the box!

TRAVEL TUBES

VISION TRAVEL TUBE

This is a great tube for the destination angler who wants to carry several rods in one tube. These are available in four different lengths; 82cm for 4-piece rods up to 10ft, 110cm for 3-piece rods up to 11ft, 140cm for 4-piece DH rods up to 17ft and 160cm for 3-piece DH rods up to 15ft (each length is the maximum length for a rod part) and their inside diameter is 10cm. There is a carry on handle, adjustable shoulder strap, address card pocket and protective end caps on both ends. Separate cloth bags are available in two different sizes to cover all 4 tubes.

REEL BAG

CODE	SIZE	RRP
V5200N	36 x 27 x 17cm	59

The Reel Bag has removable inner sections which can all be adjusted to your differing needs. It has spacious pockets for reels, spools, tackle boxes, sunglasses, camera, binoculars and much more. All your gear is kept safe inside the protective outer cover. The bag is also equipped with a double zipper and a comfortable handle.

HARD GEAR BAG

This bag is a real multi-purpose bag for the enthusiastic fly fisherman. It can be used as a spacious reel bag, accommodating a big bunch of differently sized fly reels but thanks to its genius inner wall system you can modify it as you like, according to your needs. In addition to reels you can make a supportive space for your digital SLR or video camera. Or you can use it as a big fly tying bag when travelling.

The soft divider gives extra protection when the bag is closed and its numerous zipper pockets keep your small accessories in order and easily accessible. The moulded bottom part is waterproof up to the rivets and stitches, so it can easily be left on the bottom of your boat.

LAYERING & CASUAL

NEW NALLE fleece

THE JACKET has a technical cut and snug fit, so it is ideal as a warm mid layer. It has a stretchy chest pocket and side pockets, all with zipper closure.

THE TROUSERS are slightly higher and they are designed to cover your lower back, a feature which you will like when wading deep for a long time. The ankle cuffs are slim for avoiding a material build up around your ankle, making these comfortable to wear. These also have stretchy pockets so you can drop your car keys in while ordering a coffee on your way fishing.

The **NALLE OVERALL** is the best value mid layer fleece available. Its simple design hides a technical item of clothing with a complicated cut. As standard fleece stretches in only one way, we cut it in pieces to position both vertical and horizontal stretch wherever needed for better fit and function. Instead of using normal straps that have no thermal qualities and are bulky under the waders, we made ours to fit and feel snug while offering the needed stretch. Keeping wading shoes in mind, we made the cuffs high and tight. This will prevent bulky ankles and give maximum comfort

These all are made from 280 gram fleece to keep you warm during the coldest days on the water.

bamboo

NEW BAMBOO T-SHIRT

This technical, relaxed fit T – shirt is made from a mixture of bamboo & polyester. Thanks to these materials it is highly sweat absorbent, pulling moisture from your skin evaporating it or moving it to the next layers. This function keeps you dry. The fabric is woven so that it interlocks air and therefore this is a great first layer in cooler conditions, but same time it keeps you cool in hot summer days. As bamboo fibres are like the silk for softness, this shirt feels super soft. Thanks to bamboo’s antibacterial features it keeps you feeling fresher and odour free for longer. Bamboo is one of the fastest growing plants in the world making it one of the most sustainable sources for textile fibre.

SAVE THE NATIVES*

Manufactured by Pure Waste Ltd from recycled materials. Part of the sales go to the Save the Natives foundation donated annually to a selected project aiming to improve the conditions of endangered native trout and/or Atlantic salmon stocks in Europe.

CO-OPERATION BETWEEN VISION GROUP LTD AND PURE WASTE.

Two Finnish companies, Vision Group Ltd. and Pure Waste are co-operating in the spirit of saving natural resources and especially our endangered wild salmon and trout stocks. Pure Waste textiles make ecologically sustainable and premium quality 100% recycled yarns, fabrics and ready-made garments. The products are entirely made out of recycled textile waste and offer the consumer the same quality and comfort as those made out of virgin materials. To meet the growing demand for ecological fabric solutions they utilised their long expertise in sustainable design and developed a global textile recycling and manufacturing supply chain.

They source textile waste on a global scale and recycle it into fabrics and yarns. Because their products are made entirely out of discarded waste they can guarantee their ecological sustainability, a value that guides all of their work. For instance, using recycled cotton saves 11,000 litres of water per kilogram, which would otherwise be required to produce the water intensive cotton crops. In addition to the ecological sustainability of their products, their quality is also of crucial importance to the company. By monitoring in detail their source materials and the recycling process they are able to ensure that the quality of their products fulfills all the standards required by their clients and end-customers. www.purewaste.org

SUNGLASSES

PHOTOFLITE

Photochromic lenses are the best the all-round option and work in almost every condition from low light overgrown rivers to bright sunshine. Photochromic lenses darken on exposure to UV radiation. Photoflite series lenses start very light and darken very linearly when UV light is increased.

NOTE: Photochromic lenses are not a good option for driving a car as the UV light does not penetrate the car windshield and lenses will not darken in bright sunlight.

POLARFLITE

Our Polarflite shades includes a wide collection of frames with Actif tri-acetate cellulose lenses. They give 100% protection from UVA-, UVB- and UVC light. They effectively block both visible light and the light reflected from water surface reducing the aligned, partially polarized glare. They are finished with hardcoat scratch-resistant surface. These lenses will not absorb haze and will stay constant with a low haze value of 0,4%. A perfect choice for all-round shades. These standard polarized plastic lenses have all the optical qualities needed for fishing. They are also very light. The 2by4 is designed to be worn with the glasses. Pouch included. Made in France.

MIRRORFLITE

On top of looking good the Mirrorflite series offers a bit of extra protection from the sun with the mirror coating reflecting more sun rays away from the user's eyes. All Mirrorflite models come with a hard protective case. Made in France.

THE LENS COLOUR determines how much light will pass through a lens. To keep vision optimal, you need less light in sunny conditions and more in cloudy weather.

BROWN: A superb all-round constant density lens. It provides the best combination of true colour transmission and contrast. The optimal performance is achieved in medium bright to bright conditions.

AMBER: Amber lenses are for low light conditions, they make an environment appear brighter. Amber tint also prevent blue light as a healthy aspect.

YELLOW: These lenses work as light enhancers. Good for dusk and low light as well as for overcast days and evenings.

ACCESSORIES

ULTRA FLOAT²

Ultra Float 2 is much improved. It now floats better and is easier to use. A universal non-sticky floatant which can be applied with your fingertips. Colour and scent free. Removes any remnant of human odour from the flies.

NANO SILICON FLOAT

Nano Silicon is a nontoxic, silicon floatant that doesn't leave an oil slick on the water. Thermally stable it will not harden or become too thin in differing weather conditions.

Available in 20 ml easy to use transparent bottles equipped with small chains. No need for additional bottle holsters.

Apply a drop to your fly before you cast and reapply as needed. Made in the U.S.A.

BRUSH & FLOAT

Fine powder floatant with a brush in the cap. Use it for dry flies or creating realistic looking air bubbles on nymphs, pupas or wet flies.

STRIKERIGHT

StrikeRight indicators are 30% lighter than other foam indicators, so they float higher and are easier to see and cast. Because they are aerodynamically shaped at both ends, they cause less wind resistance when casting. StrikeRight indicators are easy to apply and remove, and they are reusable. Each package includes six pieces.

NIPPERS

V9025 POWER NIPPER Wide cutting blades and bigger press area allows you to cut even the thickest fluorocarbons with ease.

V9022 SAMURAI BLADE This exceptionally fine tool cuts perfectly and easily any monofilament up to 100lb. The needle is so sharp it will clean hook eyes as well as straighten wings, hackles, wind knots, picking, dubbing etc. Made in Japan.

V9024 New affordable black nipper with pin for everyday use. Suitable for those of us who prefer stealth approach.

ZINGERS

Finally zingers that work better and never easily loosen.

V9026 This zinger has a built in hook so it's easy to attach. The 60cm long string allows you to use the attached tools freely.

V9018 Our Carbine model does not have the classic pin. It is attached with a clip.

V9019 The Roto model has a super strong pin and to avoid stress it also rotates. All zingers have durable nylon wires with a safety locking tool clip.

STRIKE INDICATOR

KIT INCLUDES TOOL, SILICONE TUBING AND YARN.

With our Strike indicator system you get the feather light presentation of a traditional yarn indicator without the kinks in the leader. There are no knots required to make this indicator which means your leader won't get damaged. It is very easy to use with the tool that comes with the kit. Thread the leader through the silicone tubing with the tool and place the yarn in the loop of the leader. Tighten from both ends of the leader and the silicone tube will slide over the yarn. Now you can trim it to desired size. Trim it small to get the sensitivity required in slower currents and light nymphs. Trim it big for the chop and heavy nymphs. The indicator is also adjustable to get the nymphs to the right depth. You can remove the indicator easily and the tube is reusable.

- Easy to use
- No knots required – no damage to the leader
- Adjustable
- Easy to remove
- Can be trimmed to desired size
- Good presentation
- Best yarn available
- 2 colors of yarn – white & orange

V9010

V9011

V9040

V9042

NEW MINI CURVED These are shorter versions of the Curved forceps. The jaw surface is flat from the tip part to protect the fly when unhooking your catch and serrated from the back, offering good grip whenever heavier twist and work is needed. The grip has a soft, bright green coating for comfortable use.

CLASSIC These are traditional forceps with straight jaws. The jaw surface is flat from the tip part to protect the fly when unhooking your catch and serrated from the back, offering good grip whenever heavier twist and work is needed. There's also a needle at the back of the jaws for cleaning fly eyes. The grip has a soft, bright green coating for comfortable use.

CURVED These are curved tip versions of the Classic forceps. The jaw surface is flat from the tip part to protect the fly when unhooking your catch and serrated from the back, offering good grip whenever heavier twist and work is needed. There's also a needle at the back of the jaws for cleaning fly eyes. The grip has a soft, bright green coating for comfortable use.

PRO Pro forceps fit comfortably into your hand, thanks to their mitten style shape. They are very easy and quick to use. The straight jaws have flat tips with a serrated back portion with a needle. The built in scissor blades will cut even the heaviest tippet material with ease.

MEGA These are designed for serious Big Mama hunters. The additional length and strength is great when unhooking toothy monsters. Behind the fly friendly jaws we have added extra sharp and long lasting Tungsten Carbide scissors. The scissor blades are made from extra high quality German Tungsten Carbide allowing you to cut even the wire leaders with ease. Soft bright green handles are comfortable even when it's really cold.

AQUA fly boxes

High-quality waterproof boxes for those of us who value our flies and want to keep them safe and dry.

AQUA MEDIUM has two separate sections with identical foams especially suitable for small and medium size flies. The transparent plastic cover of the other side is decorated with the Vision fishcamo pattern.

AQUA LARGE has two equal sections with different foams. One side of the box is suitable for small and medium size flies (individual holes) and the other for flies with larger hooks (straight cuts). The transparent plastic cover of the other side is decorated with Vision fishcamo pattern.

AQUA SALT Waterproof fly box perfect for flies with hooks. Foam on both sides.

AQUA BIG MAMA Big waterproof fly box perfect for big flies (including poppers) with hooks. Foam on both sides.

AQUA BIG DADDY Large transparent waterproof fly box perfect for big tube flies. No foam.

top salmon FLIES

TOP SALMON FLIES VOL. 2

Top Salmon Flies Vol. 2 continues from where the bestselling Top Salmon Flies – stories and patterns from great anglers left off. 13 contributors from Finland, Sweden, Norway, Russia, Iceland, Denmark, United Kingdom and Spain represent 43 top-performing salmon flies and open up about their strategies in salmon fishing. It is a modern view of salmon fishing today.

This installment of Top Salmon Flies includes contributions from Emilie Björkman, Helge Dahlen, Håvard Vistnes, Jerkko Ahtinen, Lars Munk, Marina Gibson, Mauri Peltonen, Miguel Aguilar Juan, Orla Bertram Nielsen, Rabbi Alfredsson, Kristjan Evjar, Maxim Mamaev and Tomas Kolesinskas.

This book will show you different ways to fish for salmon along with the fly patterns. But, it is your job to create your own truth about salmon fishing. If you're looking to improve your salmon fishing and catch more fish, this is the book for you!

GULFF

FLY FISHING. ADDICTION AND LIFESTYLE.

CLEAR RESINS

ALL GULFF CLEAR RESINS ARE CRYSTAL CLEAR AND TACK FREE. GULFF HAS 5 DIFFERENT OPTIONS FOR DIFFERENT PURPOSES.

CLASSIC is the best option if want only one resin bottle. Classic is a medium viscosity resin - not too thin and not too thick. It is unquestionably one of the best resins available.

THINMAN can be used for small nymph fly bodies or any other small flies. Thinman is a low viscosity resin and it makes beautiful finishing. It does not cover details. It highlights details.

FLEXMAN is the best option if you need Classic resin features but flex and soft finishing. Flexman easily fills requirements for shrimps, streamers, fly heads and eggs. Flexman is a medium viscosity resin.

FATMAN creates easily large fly bodies and is thick enough for shaping. Fatman loves streamers, fly heads and large shrimps. Fatman is a high viscosity resin.

GLOWMAN glows as the name says. It is so called in the dark glowing resin. Glowman has to be "charged". You hold it up to a bright light, and then take it to a dark place. In the dark the fly will glow for 1-10 minutes depending on the "charging time" and the amount of resin.

WADER REPAIR

Water Stop UV Repairer is the quickest, easiest and simplest method for fixing small holes and tears in tents, wading gear, boots, floating rafts and waterproof outfits. The gel dries in seconds, and your gear will be immediately ready for use. The repair gel creates a crystal clear, water-resistant, elastic and strong surface on the broken parts. The surface can easily be fixed again and again whenever necessary. In addition the great properties of the product, the small bottle makes it easy to take with you in your backpack or fishing vest. Competing products take as long as 12 to 36 hours to dry!

How to use the product: The crystal clear gel dries in seconds under UV light, and your gear will be immediately ready for use. Apply the product on the hole or tear and expose the surface to sunlight or a UV flashlight. Make sure that the surface is dry before you apply the product on it. Do not use separate patches. Depending on the size of the hole or tear, you may need to apply multiple thin layers to create the new surface. Water Stop dries within 5 to 30 seconds, depending on the intensity of the UV light. When applied correctly, the finish is non-sticky, rubbery and flexible.

FLOATANTS

DUCK THE FLOATANT is a fly floatant using brand new technology developed by the Gulff laboratory. Its properties outdo conventional floatants by far. It's time to revolutionise the market!

As the names imply, the General version of the product is intended for general use, and it is suitable for nearly all flies, while the CDC version is particularly designed for CDC materials and other sensitive natural materials. Unlike other floatants, this new floatant is silicone-free, and it is also free of any substances that are hazardous to waters. The refined three-substance complex ensures long floating times.

The floatant's properties and crystal-clear colour also enhance the original colours of the fly. Gulff's chemists have developed the floatant in collaboration with Swedish and Finnish surface fly fishing experts and social media influencers, as well as product safety consultants.

HERO 365nm/5W FLASHLIGHT

The GULFF Hero UV torch is a stylish, highly efficient and innovative solution for curing almost all UV adhesives in fly-tying. It is especially useful for a user that takes photos of the flies for social media.

As a whole, Hero represents the very best in its field. Hero is equipped with a high quality 5W LED chip and has a wavelength of 365nm in line with other GULFF torches, which has been found to be optimal for UV adhesives. The torch has a special filter that pulls out all the fluorescent material from the target surface but does not illuminate the rest of the environment.

This, for example, makes taking photos easier and takes on a completely new meaning - gorgeous fluorescent flies against a dark background. In addition, the blinding effect is minimal. Undoubtedly, Hero is a great product in terms of value for money when it comes to fulfilling even high ambitions for a UV torch.

CODE ITEM
GUFB* Hero UV flashlight
* NEW

- Hero is equipped with:
- USB charging directly to the housing
 - 5W/365nm torch with filter
 - 18650 rechargeable battery
 - USB cable
 - 1-year warranty. The warranty covers the torch housing and the LED, not the battery or the cable

PRO UV FLASHLIGHT

INCLUDING:
UV FLASHLIGHT
RECHARGEABLE BATTERY
USB CHARGER

- Flat lens due to less loss of light
- No zoom due to less loss of light
- A high quality led chip
- 365 wavelength for most resins
- Customized light control mirror
- Rechargeable batteries for the nature

CODE ITEM
GUPF Pro UV flashlight

WHY CHOOSE A UV FLASHLIGHT WITH A 365NM WAVELENGTH SPECIFICALLY?

A 365nm wavelength UV flashlight is, in most cases, the best option, optimally suited for UV resin curing. The 395-405nm UV LED lights that are now commonly used do not provide as much light in the wavelengths that best activate the resin. The Gulff 365nm wavelength LED produces a spectrum of light that best matches the absorption spectrum of the photoinitiator that is in most UV-curable resins.

The Gulff flashlight's UV light appears whiter than the light of 395nm lights. This is because the human eye cannot discern UV light when the wavelength is clearly below 400nm. In this case, the light only becomes visible when it strikes a surface that reflects UV light. Experts do not recommend using inexpensive lights with uncertain wattage for resin curing. Their wattages and advertised wavelengths can vary considerably. Note that, for example, the advertised wattage in inexpensive versions is often only the maximum possible wattage. There are a number of things that affect the ability to reach this maximum, from the LED to the structure of the flashlight (or other light source) used.
